

# END-TO-END GENERATOR SERVICES ACROSS THE UAE

*Powering Precision Engineering*

## Core Services

### Generator Installations

Standby, prime & industrial setups

### Load Bank Testing

Performance & load verification

### Generator Maintenance

Scheduled servicing & inspections

### Breakdown Support

Emergency repairs & overhauls

### Consultancy & Design

Technical advisory & planning

## Sectors We Serve

Data Centers

Healthcare

Infrastrure & Utilities

Oil & Gas

Construction

Hospitality

Ports & Terminals

Residential

# WHY CHOOSE ELECTROGEN POWERSOLUTIONS

- ✓ Engineering-Led Execution
- ✓ Hands-On Experience
- ✓ Structured & Disciplined Delivery
- ✓ Transparent Documentation
- ✓ Client-Focused Decision Support
- ✓ Accountability & Ownership
- ✓ Inhouse Load Banks/ Testing Equipment up to 2,800 KW

REVIEW • VERIFY • EXECUTE

## Technical Capabilities

- Fuel system integration & monitoring
- ATS / AMF panel integration.
- Facility Power Assessment
- Custom DB Box/ATS Panel works
- Controller replacements & conversions
- Pre-commissioning & SAT support
- and much more...

Facility Power Assessment

Controller Replacements

Custom DB/ ATS works

Fire system Integration

## Proven Project Experience

Our project experience is underpinned by the collective expertise of our engineering and technical team, with hands-on exposure across generator installations, load testing, maintenance programmes, system upgrades, and fault diagnostics within commercial, industrial, and critical power environments.

**100+**  
Generator Installations & Integrations

**100+**  
Generator Repair & Overhaul Activities

**200+**  
AMC & Lifecycle Support Interventions

**50+**  
High-Capacity Load Bank Tests (≈ 1000 kW)

**200+**  
Technical Site Reviews & Condition Assessments
